

Men's Residential Services

Each client who seeks addiction treatment needs much more than education about their disease. They need structure and support to work towards a self-sufficient and healthy lifestyle.

Intensive Residential Treatment (IRT)

- Intended for clients who need more structure and support
- Focuses on stabilization and preparing for lower levels of care
- 14-30 days in treatment

Transitional Residential Treatment (TRT)

- Focuses on transitioning into the community
- Obtaining a community support system
- 30-90 days in treatment

In addition to addiction treatment, here is what you can expect to gain from the Crossroads' Men's Residential program:
