

How it works

Are you or someone you know looking for substance use or mental health treatment? You can contact us at 1-800-304-3758 or via email at info@crossroadstp.org. If you are looking for outpatient services, an appointment will be scheduled. If you are unsure which level of care would be most appropriate, a placement assessment will be scheduled. The secretary will ask for identifying information, including insurance information. After completing your assessment, you will be referred to the treatment level most appropriate for your needs. A case manager or secretary will contact you to schedule an intake appointment.
